The Opportunity:

500px is a photographic community powered by creative people from all over the world that lets you share and discover inspiring photographs. Located downtown Toronto we are looking for new engineers to join our team:

500px is a small and agile team, working hard on building the world’s best photography platform. We are fun, creative and laid-back, but very focused and get the work done very efficiently. Our engineering team is passionate, collaborative, smart, and gets things done. We care about outcomes, not "formal process". No fluff.

If you have a proven track record of building successful software that people love, then we want to talk to you. If you want to go fast, create a great user experience, and work on something that millions of people will use, come talk to us.

Some things you will be working on:
- Building image recognition software to make sense of the images on our system
- Colour indexing and search mechanisms
- Photo identifications and tracking systems

Technical requirements:
- Ruby on Rails 3
- MySQL, MongoDB, memcache, Redis
- Javascript frameworks (jQuery, Prototype, etc)
- Knowledge of high scalability issues and solutions
- (Restful) API design experience
- OAuth
- Experience working with Facebook and Twitter APIs. Other APIs (GMaps, Foursquare, Youtube) are great too.
- Automated testing
- Mobile platforms experience is great to have

Sound interesting? Checkout our website 500px.com, fire us your resume & we'll book a time to meet with you.
